

HEALTH SERVICES AND SOCIAL INSURANCE

Selcuk University offers a certificate of health and fulfills all types of treatment services for students with no social insurance within the framework of laws if they apply to their faculties or schools, provided that they produce documents proving their situations. The students' expenses for ambulatory and residential treatment are met by Selcuk University.

By making agreements with all university hospitals, treatment services are provided for students in cities including holiday periods.

Treatment services are firstly given in Campus Student Health Center located on Campus. The health centers offer service with two fully-equipped ambulances. Furthermore, these provide services such as urine and blood analyses, x-ray and ultrasound.
